

## About Cobo

Cobo is a leading global digital asset custody solutions provider.

Founded in 2017 and headquartered in Singapore, Cobo is one of the largest digital asset custodians globally, trusted by over 500 institutional clients across Asia, Europe, the Middle East, and North and South America, with billions of dollars in assets under custody.

Cobo offers a comprehensive suite of custody technologies from full custody (HSM-based), co-managed custody (MPC-based), to fully decentralized self-custody (smart contract-based). On top of custody solutions, Cobo provides Wallet-as-a-Service, SuperLoop (off-exchange settlement network), and Argus (on-chain DeFi investment tools with role-based access controls).

Cobo is SOC 2-compliance certified and licensed in the US, Singapore, Hong Kong, Lithuania and Dubai (provisional approval for Virtual Asset License).

The Company is backed by top-tier global investors including DST Global, A&T Capital, IMO Ventures, and DHVC Capital. In September 2021, Cobo completed its USD 40 million Series B financing round.

## Cobo Products

### Cobo Custody

Cobo offers industry-leading custody technologies that are built for institutions, and designed for security and operational efficiency. Cobo supports more than 1,800 tokens across 70+ chains as well as NFTs, making it the platform with the most comprehensive coverage in the market.

Our custody solutions range from Full Custody where Cobo takes care of everything for you, to MPC Co-Managed Custody where you're in full control of your funds at all times, and Smart Contract-based Self-Custody which is fully decentralized.

### Full Custody

Enjoy the convenience of Cobo's Full Custody while having the peace of mind that your assets are protected by our military-grade security. Cobo's multi-layer defense combines bank-grade hardware security modules (HSM) and Intel SGX, a 3-tier wallet architecture, global distribution key storage, a customizable risk policy engine to cater to your specific needs, and more.

### MPC Co-Managed Custody

Built on cutting-edge multi-party computation (MPC) technology, Cobo's MPC Co-Managed Custody empowers you to have complete control over your assets. By splitting the private key into individual encrypted key-shares, Cobo ensures no single party ever has access or visibility of the full private key, protecting you from external and internal attacks as well as human errors.

### Smart Contract-based Self-Custody (Cobo Safe)

Built on top of Gnosis Safe, the de-facto multi-sig wallet, Cobo Safe offers fully decentralized smart contract-based custody. Packed with powerful features including robust role-based access controls, highly customizable workflow support, and advanced risk management tools, Cobo Safe makes it easier than ever to scale your operations and manage your assets securely and efficiently.

### Cobo Wallet-as-a-Service (WaaS)

Cobo Wallet-as-a-Service (WaaS) provides a standardized set of wallet APIs, making it quick and easy for businesses and developers to integrate an enterprise-grade wallet into their applications. With Cobo's battle-tested security infrastructure and comprehensive support for over 1,800+ tokens across 70+ chains, you can focus on your core product without worrying about engineering costs and underlying technical complexities of building a wallet from scratch.

### Cobo SuperLoop

Cobo SuperLoop is a pioneering off-exchange settlement network that allows institutions to trade on exchanges while maintaining full control of their funds using cutting-edge MPC technology. SuperLoop eliminates exchange counterparty risk by enabling traders to lock and mirror funds under independent custody to their exchange account directly for immediate trading. Now you can trade with greater confidence and efficiency - No more constant monitoring of exchange exposure or rebalancing of accounts.

### Cobo Argus

Cobo Argus paves the way into the future of frictionless institutional DeFi investments. As a pioneering on-chain digital asset management solution, Argus provides state-of-the-art tools and functionalities, including role-based access controls, parameter-level risk management, DeFi strategy bots, on-chain data monitoring, and more.

## Cobo Licenses

Cobo is licensed in the US, Singapore, Hong Kong, Lithuania and Dubai (provisional approval for Virtual Asset License)
